

The world oil companies have been trying to do everything possible to stop you getting hold of this sensitive information, but now it's too late...
...because the secret is out!

"Discover How You Can Easily Convert Any Vehicle's Engine To Run On Water And Fuel, Saving Up To 70% On Running Costs And... Dramatically Reduce Harmful Emissions"

Dear Vehicle Owner,

Here's how you can save \$1,000's a year on gas or diesel...

It doesn't matter whether you own a car, a van, a truck or a lorry and it doesn't matter whether your vehicle runs on gasoline or diesel, you can now save huge amounts of money on your vehicle running costs.

This technology has been available for about 90 years and despite every conceivable effort by the greedy oil companies to keep the lid on this amazing discovery, it's fast becoming common knowledge.

Water is the new power! And... it's accessible to everyone.

You're just about to learn how anyone with basic DIY skills can build a simple inexpensive device, attach it to a vehicle's engine and convert that vehicle into a water-burning hybrid...

- **Saving up to 70% on fuel costs**
- **Drastically reducing harmful emissions**
- **Dramatically increasing engine performance**
- **Significantly increasing the life of your vehicle's engine**
- **Cheaper and safer than any other vehicle engine conversion technology**
- **Works equally well with gasoline and diesel engines**
- **The device is simple to build, install and maintain**
- **The technology works... guaranteed!**

How is this possible? Can a vehicle engine really run on water and fuel?

Yes! And the technology that makes this happen is very simple.

Water is 2 parts (atoms) hydrogen and 1 part oxygen = H₂O. Hydrogen and oxygen are both gases and hydrogen is a naturally occurring gas that is the lightest gas known to man. The hydrogen atom is simple and small, yet it is the most important and abundant substance in the universe. Hydrogen atoms are the building blocks of most other atoms.

Ninety per cent of all of the universe's atoms are made of hydrogen. The sun, all the stars and large planets are made of hydrogen combined with other gases. Hydrogen is the fuel that makes stars like our sun burn brightly.

Here on earth, hydrogen combines with oxygen to form water, which is essential for life on earth. Water makes up around 75% of the earth's surface and three quarters of our bodies are also made of water. Fossil fuels like coal and oil are made of hydrocarbons, which is a combination of hydrogen and carbon.

Hydrogen gas is very flammable but burns at a lower temperature than other fuels, which adds to greater fuel efficiency. The hydrogen is separated from the water compound using a system of electrolysis. The result is **Oxyhydrogen** (HHO), a gas which will combust when brought to its auto-ignition temperature.

Water and heat are given off as a bi-product. The whole combustion process and waste are 100% environmentally friendly.

But the best part is...

Water is freely available. It's like having your very own personal oil well and refinery. **It's fuel-on-demand!**

In the not too distant future, all vehicles will run completely on hydrogen extracted from water. Water is the fuel of the future. The future is here and now, and here's your chance to experience the future.

Ever increasing fuel prices indicate that now is the time to take action

Everyone, all over the world is experiencing the painful cost of fuel increases and it will get a lot worse. These escalating prices will never come down, they will just

keep on rising as the demand for gasoline and diesel increases. They will then continue to rise sharply as oil reserves run low. And as we all know, eventually oil will run out completely. So what then?

Now you don't have to put yourself at the mercy of the ruthless oil barons and you don't have to submit to their every demand for your hard-earned cash. Let them go ahead and raise their prices. You won't have to worry too much because you can cut your fuel consumption by more than half right now.

Thousands of people have done it already and hundreds of thousands more are about to join them as they too learn about this new and incredible fuel saving device. All you need is the relevant information to be able to build your own water conversion device and you will be saving a fortune on fuel just like them.

Now is the time to seriously consider your options. Do you really want to pay higher and higher prices for your gasoline and diesel? Or do you want to slash your vehicle running costs by at least 50% right now? Simple questions right?

And the answer is obvious, but how can you get hold of the vital information you need to be able to build a HHO generator?

Well the good news is, we have all the necessary information that you need, but first... you should know a little more about this ground-breaking technology.

How does it work and is it safe?

Building the device is simple as you will soon discover. And you can buy all the components for less than \$50. Once it is installed it will use a little electricity from your car's battery to separate water into a gas called HHO (2 Hydrogen atoms + 1 Oxygen atom). HHO is also known as **Brown's Gas**, which burns cleanly and efficiently, providing copious amounts of energy. And the only waste product is WATER!

This is how it all works...

A small (950 cc) container is placed in a suitable position somewhere under the hood. You fill it with **distilled water** and a small amount of **baking soda**. A vacuum is formed within the device from pipes connected to the carb air intake, and electricity (12 Volts) is supplied by the vehicle's battery. This then produces HHO gas (Hydrogen+Oxygen).

The HHO gas is supplied to the engine via any of the vacuum lines, which are connected from the engine's intake manifold, carb or fuel injectors.

The device supplements the gasoline or diesel with a small amount of hydrogen gas and extra oxygen. The hydrogen then helps the fuel burn more efficiently,

while producing its own combustion. This added combustion of the hydrogen gives the vehicle engine more power, so ultimately it requires less fuel to run the engine, resulting in much improved gas mileage per gallon.

Think about it! If you save 50% on fuel you will only be paying half what you are paying now. Or, to look at it another way you will only be paying half the price for a gallon of fuel. Whichever way you look at it you can't lose.

And is it safe?

Absolutely! Although Hydrogen itself is a highly volatile and explosive gas, when mixed with water vapour, as in the case of the HHO generator, it is perfectly stable and therefore completely safe.

It's safe to use and it's kinder to the environment too.

HHO also helps to eliminate carbon deposits caused by unburned gasoline. It will systematically clean your engine every time you drive. During the first few weeks you will notice that the engine is running much smoother. Then it will steam-clean itself every time you drive.

Immediately upon installation, the HHO generator changes the combustion cycle and makes the process more stable. The resulting effect is less noise and less vibration, which also reduces any strain on the transmission leading to smoother gear shifts, cleaner pistons and valves, and generally better engine operation.

Water cools down the engine reducing wear, breakdowns and maintenance costs. Any truck owner will tell you that their truck is fitted with a water injection system that helps cool the engine and costs... thousands of dollars!

The HHO device does not interfere with the vehicle's computer and can be removed within a matter of minutes. Once removed the vehicle will perform just as it did before the device was fitted, only now it will revert to using more fuel as before.

Frequently Asked Questions

I know it can be difficult for some people to believe that a vehicle can be easily converted to run on water and fuel, and I don't blame you if you are one of the many skeptics. I was skeptic too... at first. Then I decided to get all the facts and scrutinize all the information available down to the very last detail.

Here are a few of the questions I am frequently asked about this technology, together with all the answers...

Q: Who discovered the HHO generator?

A: Professor Yul Brown, a Bulgarian scientist who emigrated to Australia, first developed a machine that converted plain tap water into a stoichiometric mixture of hydrogen and oxygen without causing an explosion. Basically, he discovered another state of water besides ice and steam. It's called Brown's Gas. He later produced a commercial welder which uses the gas.

Q: How much water is needed to produce sufficient HHO to run a vehicle?

A: Not very much! One liter of water makes 1,860 liters of Brown's gas.

Q: Can I just buy the HHO conversion kit and have it installed?

A: Yes you can. There are a few small commercial producers of the kit who charge around \$1,000 for it and another £1,000 to install it.

Q: Can I find the information needed to build a HHO generator on the Internet?

A: Yes, you will find bits of information here and there but you will need a lot of time and patience trying to figure out how to put everything together and how to make it work properly.

Q: How long will it take to build the HHO generator?

A: Once you have bought all the necessary components, it will only take a few hours to build it and install it, providing you have the right information.

Q: Can you provide me with all the information I need right now?

A: Yes I can! I have produced 2 ebooks (pdf's), which you can instantly download right now. They contain absolutely everything you need to know about the components you need, how to build the HHO device and how to safely install it.

Q: What makes your ebooks any better than other HHO information books?

A: Years of research and the results of my own tests have proved conclusively that the information I provide in my ebooks is factual, extensive and complete.

You won't find a more comprehensive guide anywhere on the Internet... guaranteed!

Q: What is the cost of your ebooks?

A: I want everyone to be able to save fuel and help the planet, so I have priced my 2 guides at just \$60. You could easily recover the costs within a week!

Some people are charging over \$200 for much inferior information.

Don't waste another minute... You need this vital information now!

For just \$60 you can save \$1,000's a year on your vehicle fuel costs. Can you really afford not to have it? Even if you are not good at DIY, there is bound to be someone you know who is. Just ask them to build the device for you and they can build one for themselves too.

If you are good at DIY you could make a good living by building the HHO devices and installing them for other people. You can charge \$400, \$600 or even \$800 and still be cheaper than the commercial installers. You could make \$1,000's every day!

Don't waste anymore time or money... buy your copies of the **Car-2-Water** information guides now.

BUY NOW BUTTON

90 Day, 100% Money-Back Guarantee!

I don't want you to be disappointed with your purchase in any way, so for your peace of mind, I'm going to give you my personal 100%, no-quibble, money-back guarantee.

Buy the **Car-2-Water** guides now, read through the easy to follow instructions and look at the detailed images and illustrations. Build and install your own HHO generator and I promise you, you will be amazed at the results.

But, if you are not completely satisfied, then simply let me know within 90 days of purchase and I will gladly refund 100% of your money... no questions asked!

Remember! You will be saving \$1,000's on fuel and you'll be helping the precious environment to stay cleaner.

A Special Offer For You... ...If You Buy Today Only

Buy my **Car-2-Water** information guides today and I'll give you no less than...

FIVE FREE BONUSES!

~*~*~* FREE BONUS #1 *~*~*~

Exclusive Access to HHO Devices and Installers. Some as low as \$45 and some offer Free Shipping Worldwide!

Once you place your order for the **Car-2-Water information guides** you will have the following options...

- Learn how to build and install this system yourself.
- Have one of our many friends from around the world build a COMPLETE READY-TO-INSTALL SYSTEM for you.

That's right! You will get access to our privileged customer-only marketplace where you can choose from many great offers, some as low as \$45, for the Electrolyzer (HHO Generator).

The marketplace is organized by country & state, category and price range, to help you find a seller or installer near you - and within your budget!

Even if you have someone build a HHO generator for you, you will still need the ebooks to understand how to maintain the generator or how to fix it or renew it, should this be necessary.

The Marketplace is a **free service to our readers!** We do NOT charge any further fees from our customers OR impose any commissions on our sellers in the Marketplace.

With this arrangement, you can compare the markets and find the one that's best for you, as well as enjoying the full benefits of this revolutionary technology.

~*~*~* **FREE BONUS #2** *~*~*~

"Free Energy Secrets" by Patrick J. Kelly

Value \$39

This is the most comprehensive reference book on Practical Free Energy Devices that you will ever find anywhere.

Patrick J. Kelly, a world expert on the subject of **Free Energy** and an excellent author, has extensively researched, compiled and written his best-selling book, which includes...

- A massive table-thumping...1,422 pages of mind-boggling information
- Hundreds of descriptive photographs
- Little-known inventions, explained in text and with drawings
- Colorful demonstrations of how it's done and how it works
- An easy-to-follow Electronics Tutorial
- 21 interesting videos, and much, much more...

If you've ever been just slightly curious about **Free Energy**, this is a must-have resource. And it's yours to keep with your order (NOTE: Instant download only, no product will be shipped). Courtesy of Panacea Online University.

~*~*~* **FREE BONUS #3** *~*~*~

Blueprints for 100% Water-Driven Cars

Value \$99

I've seen similar water-car plans sold on eBay and other websites from between **\$20 to \$189 each**. Don't pay \$100's for these water-car plans because you will receive this rare compilation of **12** blueprints for building your very own water car absolutely FREE!

The term "Water-Car" means it will burn just WATER. No gasoline at all, or in some cases only 3% gasoline is used as a cheaper alternative to rust-proofing the engine.

These documents are not an advertisement to buy anything. This is pure information including the text and graphs to mechanical diagrams and electronic schematics.

When you purchase the **Car-2-Water information guides** you will receive immediate access to water-car designs by the following inventors:

- **Stan Meyer** (Stanley Meyer, reported murdered by Big Petrol)
- **Carl Cella**
- **"Joe"** the mysterious inventor from Australia, documented by Alex Schiffer and others
- **Bob Boyce**
- **Xogen** (based in part on Stan Meyers and his brother Stephen Meyer)
- **Paul Pantone**
- Rudolph W. Gunnerman
- Juan Carlos Agüero
- **Archie Blue**
- "Smack" Booster
- **HydroStar** (or Hydro-Star, and its newer version **HydroGen** or Hydro-Gen)
- The Australian **"Nitro Cell"** by unknown inventor
- The famous Camaro design by an auto mechanic identified only as "S1R9A9M9"
- Water-car plans published by Drunvalo Melchizedek

(Only available as instant downloads, no product will be shipped).

~*~*~* **FREE BONUS #4** *~*~*~

"How To Maximize Your Tax Write-Offs For Car & Truck Expenses"

Value \$37

LET THE IRS PAY FOR YOUR CAR UPGRADE!

Discover how you can claim your water-car costs back from the IRS - as you deserve. Why are you **entitled** to get your money back? Because by driving a "green" car you will be HELPING THE NATIONAL ECONOMY by reducing costs on pollution control, hospital admissions, lost time due to sick days, and the national debt for imported oil.

Since 2005 the American IRS could not ignore alternative fuel anymore, and started giving considerable rewards for "green" cars, "green fuels" and "green upgrades". The IRS code states that you can benefit from this reward regardless of whether you drive your vehicle for business or pleasure.

Keep all your receipts - according to the information contained in this book you should get your installation costs back as well.

You can get back up to \$2,000 for a car or up to \$50,000 for a truck!!!

We cannot guarantee your tax returns because rules can change each year and can be subject to location. We recommend you consult a tax professional. However, you will get all of this useful information...

- Official IRS paperwork for claiming your money back as tax deductions for each vehicle you're installing **Car-2-Water** in.
- The complete IRS codes regarding green vehicles/upgrades.
- DETAILED INSTRUCTIONS ON HOW TO FILE FOR MAXIMUM DEDUCTIONS.

* The IRS defines **Hydrogen** as one of several "clean-burning fuels."

(Available as an instant download only, no product will be shipped).

~*~*~* **FREE BONUS #5** *~*~*~

"Convert Your Car as Well as Gasoline! (DVD Edition)"

Value \$47

This is a DVD edition of the ebook about building/installing the HHO **TECHNOLOGY!**

Simply watch and learn...

- How to build the **Car-2-Water** HHO system at home: How to find Low-Cost components and step by step Construction Procedures
- Installing the **Car-2-Water** Boosters & Enhancers
- Maintenance & Troubleshooting
- Using the 5 Systems: Electrolyzer (Hydrogen Generator), Vaporizer, Charged water, etc.

And much more!

That's over \$200 worth of bonus products when you buy the **Car-2-Water** information guides, but this offer is available for today only.

BUY NOW BUTTON

Still not sure? Let's look again at what you get...

- The complete **Car-2-Water** information guide – 115 well researched pages of vital information concerning this amazing technology. You can read and fully understand how it all works.
- The **Car-2-Water** design & build User Guide – 185 professionally written pages containing essential design elements, components, build and installation instructions. Your own blueprint for saving fuel and money.
- **Bonus #1 - Exclusive Access to HHO Devices and Installers.** Some as low as \$45 and some offer Free Shipping Worldwide! You will get access to our privileged customer-only marketplace where you can choose from many great offers for the Electrolyzer (HHO Generator).
- **Bonus #2 - (Value \$39) "Free Energy Secrets" by Patrick J. Kelly.** Patrick J. Kelly is a world expert on the subject of Free Energy. His best-selling book is 1,422 pages, which includes... descriptive photographs, little-known inventions, an easy-to-follow Electronics Tutorial, 21 interesting videos, and much, much more...
- **Bonus #3 - (Value \$99) Blueprints for 100% Water-Driven Cars.** You could pay \$100's for this rare compilation of 12 blueprints for building your very own water car. These are the design plans for creating a device, which will allow a vehicle to run completely on water.
- **Bonus #4 - (Value \$37) "How To Maximize Your Tax Write-Offs For Car & Truck Expenses".** If you live in the US, you can claim back all of your costs for the **Car-2-Water** package because you will be helping the national economy. Other governments also have similar schemes. This guide explains how to claim back all or most of your costs, on the grounds of helping the environment.
- **Bonus #5 - (Value \$47) "Convert Your Car as Well as Gasoline! (DVD Edition)".** Read the book? Now see the movie! This DVD shows you how it's all done. Nothing is left out and you'll see for yourself just how easy it really is to build and install your own HHO generator.

- **Plus... Our 90 day, 100% - No-Quibble, Rock-Solid Money-Back Guarantee!**

BUY NOW BUTTON

Do you really want to keep lining the pockets of the big oil company directors and CEO's with your hard-earned cash?

Do you care enough about the planet and the legacy you will be leaving for your children?

It all makes sense to convert your vehicle to **Car-2-Water**, save money and cut down on pollution.

And remember! The **Car-2-Water** HHO generator is 100% guaranteed, so you have absolutely nothing to lose.

Plus! Buy today and you will receive 5 valuable bonuses worth well over \$200.

Don't delay... get your copies of the **Car-2-Water** information guides right now and join the fuel revolution.
